

INK Lacquer 2215

Food contact and low migration

INK LAKIER 2215: Water food contact and low migration lacquer in-line end of press coating units. Formulated for application where normal gloss results are required.

Substrates: paper and corrugated.

Single-side: yes

Double-side: yes

Performance:

normal rub resistance	
good het resistance 120°C face to face	
good water resistance after 24h	
gloss	4
slip	3
alcohol resistance	1
alkali resistance	1
block resistance	3
dry speed	3

Viscosity: available at DIN 4 @ 20°C between 35-45 second

Solid : 37% +/-5

Reaction (in pH): 7,6-8.5

Package: bucket: 20 kg, 30kg drum: 200kg or IBT 1000kg

Additions:

- CA-010558 antifoam max 1%
- CF-00130 cleaner
- CW-531184 addition for rub resistance max 6%

Cleaning: water and/or alcohol
Dried coating can be removed with wash-up solution CF-00130 cleaner

Storage: In their original containers, unopened and stored under normal conditions are guaranteed for 6 months. Protect from frost, below 5°C
